**DESIGN AN APP. GET CREATIVE. COMPETE. LEARN. HAVE FUN.**

Fontbonne University presents GriffinHack, an all-day hackathon competition for teams of high school students. We're looking for creative thinkers and students who are excited about app design.

**This event is presented in partnership with the Mathematics Educators of Greater St. Louis.**

**Saturday, February 24, 2018 • 7:30 a.m. – 6 p.m.**

**THE CHALLENGE**

It would violate the spirit of the hackathon if we explained the specific task before the event, but we promise that the challenge will entice the creative juices of participants. Teams will be **designing** an app, but will not be required to code the app.

**TEAMS**

Each team will consist of two to four students. Each high school can enter a maximum of three teams. The hackathon will be capped at 20 teams.

**REQUIREMENTS**

- Teams must consist of high school students from a single school within the greater St. Louis area.
- Students must have some knowledge of mobile app design and the ability to use tools such as Photoshop or InVision to help with the design.
- Teams need to bring a laptop with software of the team's choice already downloaded.
- The app designs will be presented using PowerPoint or some other presentation tool before a panel of judges at the end of the day.
- A coach/sponsor must accompany each team but will not assist the team in designing the app.

**COST (per team)**

\$20 - RSVP by January 23  
\$25 - RSVP by February 6

**FOOD**

Breakfast and lunch will be provided. Snacks and beverages will be available throughout the day.

**LOCATION**

Medaille Hall - ground floor  
6800 Wydown Blvd., St. Louis, MO 63105
